Professional Summary

Data and Automation Engineer with 2+ years of experience building production-grade Python pipelines, ETL systems, and ML-powered automation tools across e-commerce operations, supply chain, and logistics. Sole automation POC across 12–13 teams at Printo – shipped 6 live automation products now used daily across the organisation. Proven ability to design and deploy end-to-end data pipelines, API integrations, and predictive models with measurable business impact. MSc in AI/ML (MIT-ADT University, Pune). Seeking Data Engineer or Data Analyst roles where automation and scalable data systems drive operational efficiency.

Experience

Automation & Data Analyst (AI and Automation)

Mar 2026 – Present

Printo, Bangalore

- Sole automation POC for 12–13 teams across the organisation; shipped 6 live automation products, each adopted and used daily by respective teams to eliminate manual operational work.
- Built an ML-powered logistics route optimizer using Python (Pandas, NumPy) and heuristic algorithms, improving SLA adherence and reducing average delivery time by 10–15%.
- Developed a nightly Python ETL pipeline scanning 100,000+ SKU rows, triggering real-time inventory alerts via WhatsApp Business API and Google Chat API – zero missed stockouts since deployment.
- Led migration from Google Sheets to a scalable AI and rule-based reporting system, cutting manual reporting effort by 60% and improving data reliability across teams.
- Integrated Gmail SMTP and Nodemailer into automated notification pipelines, eliminating manual email follow-ups across 4+ operational workflows.
- Applied time-series forecasting and statistical regression models to predict demand fluctuations, improving inventory planning accuracy by 20%.
- Analysed user engagement and content performance data to align campaign strategies with business KPIs.

Fulfillment Analyst

May 2025 – Mar 2026

Meesho, Bangalore

- Performed data analysis for a third-party vendor risk project within a 43-member cross-functional team spanning operations, procurement, and support.
- Built automated Power BI dashboards and SQL-driven KPI trackers, reducing stakeholder reporting time by 40%.
- Identified delivery bottlenecks and anomalies in large-scale order lifecycle datasets using advanced SQL (joins, subqueries, window functions, aggregations).
- Designed SQL and Excel-based vendor risk trackers monitoring SLA breaches, compliance deviations, and performance patterns for high-risk vendor identification.
- Ran A/B tests and statistical significance analysis on fulfillment process changes ahead of company-wide rollouts.
- Collaborated cross-functionally with Product, Operations, Finance, and IT to ensure data integrity and decision alignment.

Machine Learning Intern

Dec 2024 – May 2025

ExosphereX AI, Pune

- Developed and evaluated machine learning models for internal AI product features, working with structured and unstructured datasets.
- Assisted in building and testing ML pipelines covering data preprocessing, feature engineering, model training, and performance evaluation.
- Collaborated with the engineering team to integrate model outputs into production-ready workflows.

Software Engineer (Data & Analytics Focus)

Aug 2024 – Nov 2024

Skylex Technology, Pune

- Analysed campaign performance data (CTR, conversion rates) to identify underperforming segments and built automated reporting and budget utilisation trackers.
- Provided data-backed recommendations that improved marketing efficiency and reduced wasted ad spend.

Machine Learning Intern

Feb 2024 – Mar 2024

IIT Bombay, Mumbai

- Worked on applied machine learning research, gaining hands-on experience with model development, data preprocessing, and ML experimentation methodologies.
- Contributed to research-oriented ML tasks under academic supervision at one of India's premier technical institutions.

Projects

ML-Based Logistics Optimization Model *Python, Pandas, Heuristic Algorithms – Production @ Printo*

- Built an end-to-end route optimization system combining ML and heuristic algorithms to minimize delivery time and maximize SLA adherence.
- Pipeline: data preprocessing, feature engineering, distance-based route selection, real-time decision support API.
- Reduced average delivery time by 10–15%; deployed in production and used daily by the operations team.

Inventory Automation & Alert System *Python, WhatsApp API, Google Chat, Supabase – Production @ Printo*

- Automated nightly scanning of 100,000+ SKU rows; triggers real-time alerts to ops teams when stock falls below threshold.
- Replaced a fully manual daily check by 3 people – zero stockouts since go-live.

Third-Party Vendor Risk Management System *SQL, Excel, Power BI – Oct 2025 @ Meesho*

- Designed SQL and Excel-based risk trackers monitoring vendor compliance, SLA breaches, and performance deviations for 100+ partners.
- Identified recurring high-risk vendor patterns; findings adopted into the procurement review process.

Predictive Maintenance Classification Model *Python, Random Forest, XGBoost, scikit-learn*

- Built a classification model predicting industrial equipment failure from sensor data; handled class imbalance via resampling techniques.
- Improved prediction accuracy by 10%; validated feature significance using statistical hypothesis testing.

Skills & Tools

Programming & Automation: Python (automation scripts, ETL pipelines, data processing), Node.js, Webhooks, FastAPI, Gmail SMTP, Nodemailer, Twilio, WhatsApp Business API, Google Chat API, Google Sheets API

Data Engineering & SQL: SQL (Advanced – joins, subqueries, aggregations, window functions), ETL pipeline design, PostgreSQL, Supabase, MySQL, data pipeline automation

Data Visualisation & BI: Power BI, Tableau, Excel (Pivot Tables, Advanced Formulas), Google Sheets

Machine Learning & Analytics: Pandas, NumPy, scikit-learn, Random Forest, XGBoost, Time-series forecasting, Regression analysis, A/B Testing, Anomaly Detection, Hypothesis Testing

Domain Knowledge: Supply chain, Inventory management, Last-mile logistics, Vendor risk management, Fulfillment analytics, E-commerce operations

Collaboration & Tools: Notion, Slack, Jira, Cross-functional stakeholder management (Product, Operations, Finance, IT)

Education

Master of Science – Artificial Intelligence and Machine Learning 2023 – 2025
MIT-ADT University, Pune, Maharashtra

Bachelor of Science – Computer Science 2020 – 2023
SMBST College, Sangamner, Ahmednagar, Maharashtra — Grade: 7.76/10
