Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Automation engineer who turns manual, ticket-heavy operational processes into automated and assisted resolution workflows. Currently the sole AI/automation point of contact across 13 teams at Pinto, capturing requirements and building bots, data pipelines, and monitoring that run end-to-end in production. Previously automated Jira incident and service-request workflows (auto-response, round-robin and shift-based routing) for IT and Infrastructure teams. Strong in Python, SQL/MySQL, API integrations, troubleshooting, and AI-assisted development, combining custom bots, AI, and monitoring to reduce ticket-based and non-ticket-based effort.

EXPERIENCE

Data Analyst Mar 2026 – Present  
**Pinto** Bangalore

- Sole AI/automation point of contact across 13 teams; sit with product, operations, procurement, and finance stakeholders to map manual, repetitive processes and translate them into automation solutions, reducing recurring ticket-based and non ticket-based effort.
- Built automated monitoring and alerting: a nightly Python pipeline scanning 100,000+ SKU rows that triggers real-time low-stock alerts via WhatsApp Business API and Google Chat, replacing a manual daily check done by 3 people with zero missed alerts since go-live.
- Built a Groq-powered LLM document extraction tool (Python, Streamlit, llama-3.1-8b-instant, pdfplumber, pytesseract) for the Finance/AP team, combining AI reasoning with custom logic to extract fields from invoices and POs and auto-match delivery challans, cutting manual data entry.
- Shipped 6 internal automation tools now in daily production use, including approval-routing email workflows and a Firebase backed material classification and inventory tool used by ~10 procurement and ops users.
- Designed and maintained ETL pipelines across Google Sheets, Firebase/Firestore, Supabase, MySQL/PostgreSQL, and REST APIs, ingesting and transforming structured and unstructured data from multiple sources. - Own each solution end-to-end: requirement capture → design → build → user testing → production rollout → monitoring, troubleshooting, and iteration.

Fulfillment Analyst May 2025 – Mar 2026  
**Meesho** Bangalore

- Served as automation point of contact for IT, Operations, Sales, HR, and Infrastructure teams; partnered with each team to map manual, ticket-driven processes and identify automation opportunities.
- Automated Jira incident and service-request workflows on Atlassian for IT and Infrastructure teams, building an auto response bot, round-robin and shift-based ticket routing, and automated acknowledgement/reply, reducing manual triage and assignment effort.
- Built Slack workflow automation for internal request handling and team communication.
- Designed SQL, Excel, and Power BI trackers monitoring SLA breaches, compliance deviations, and performance patterns; analyses adopted into the procurement review process.
- Worked across Product, Operations, Finance, and IT to align definitions and communicate insights to both technical and non-technical audiences.

Machine Learning Intern Dec 2024 – May 2025  
**ExosphereX AI** Pune

- Built and evaluated ML models for internal AI product features across data preprocessing, feature engineering, training, and evaluation; integrated model outputs into production-ready workflows.

**Software Engineer**  
**Skylex Technology**

Aug 2024 – Nov 2024  
Pune

– Analysed campaign performance data (CTR, conversion rates) and built automated reporting pipelines that informed spend reallocation decisions.

---

**Machine Learning Training Program (Acmegrade – IIT Bombay Mood Indigo) |** Feb 2024 – Mar 202

– Applied ML research under academic supervision — model development, data preprocessing, and structured experimentation; documented methodologies and findings.

---

**SELECTED AUTOMATION & AI PROJECTS**

**Meesho**

Incident & Service-Request Automation (Jira) | Atlassian Jira, Slack, workflow automation.

– Auto-response bot, round-robin and shift-based ticket routing, and automated acknowledgement for IT

and Infrastructure teams; reduced manual triage, assignment, and first-response effort.

---

**Printo**

Real-Time Inventory Monitoring & Alert Pipeline | Python, ETL, WhatsApp API, Google Chat, MySQL, Supabase.

– Automated nightly scan of 100,000+ SKU rows with threshold-based real-time alerts; replaced a manual daily check by 3 people, with zero missed stockout alerts since go-live.

LLM Document Extraction Tool | Python, Groq API (llama-3.1-8b-instant), Streamlit, pdfplumber, pytesseract — Production

– AI-driven extraction of structured fields from invoices and POs (digital and scanned) with automated challan-vs-PO matching; output to Excel via openpyxl.

Material Classification & Inventory Tool | Python, Firebase/Firestore, REST APIs, Excel automation — Production

– Multi-region tool with ETL sync scripts and role-based access control (admin, procurement, commercial, inventory, region); in daily use by ~10 users. Authored an infrastructure PRD for migration to AWS (DynamoDB, API Gateway + Lambda, Cognito, S3 + CloudFront).

---

**SKILLS & TOOLS**

**Intelligent Automation & Bots:** Workflow and ticket automation, incident/service-request automation (Jira/Atlassian), auto response and auto-reply bots, round-robin and shift-based routing, custom bot development, process mapping, real-time and preventive monitoring & alerting  
**AI & LLM Development:** Prompt engineering, LLM API integration (Groq/llama, OpenAI-compatible APIs), AI-assisted development (Claude, ChatGPT, Gemini), structured output extraction from unstructured documents  
**Data & SQL:** MySQL, PostgreSQL, SQL Python (ETL, automation, data processing), Google Apps Script, REST APIs, Webhooks, Firebase/Firestore, Supabase.

---

**Tools & Platforms:** Atlassian Jira, Slack, Excel, Google Workspace, Git

**ML & Analytics:** Pandas, NumPy, scikit-learn, classification, anomaly detection, A/B testing, predictive modelling  
**Professional:** Incident management, troubleshooting & root-cause analysis, requirements gathering, stakeholder communication, technical documentation, client relationship

---

**EDUCATION**

MIT-ADT University 2023 – 2025 Master of Science – Artificial Intelligence and Machine Learning  
Pune, Maharashtra

SMBST College 2020 – 2023 Bachelor of Science – Computer Science (Grade: 7.76/10) Sangamner, Maharashtra
